

WHERE TO FIND MORE INFORMATION ON LUNG CANCER

**The National
Cancer Institute,
International
Cancer
Information Center**
Bldg. 82, Rm 123
Bethesda, MD 20892

The National Cancer Institute (NCI) is part of the Federal Government. NCI coordinates the government's cancer research program. It is the largest of the 17 biomedical research institutes and centers at the National Institutes of Health (NIH). It is located just outside Washington, DC, in Bethesda, Maryland.

*You can contact NCI's International Cancer Information Center for any information on lung cancer or any other cancers by phone or the internet at:
1-800-4CANCER (1-800-422-6237)/<http://www.nci.nih.gov/>*

**The American
Cancer Society**

The American Cancer Society is a non-profit organization that fights against cancer through its programs in research, patient services, prevention, detection and treatment and advocacy. The American Cancer Society promotes early cancer detection through education, intervention and highly successful programs like the Breast Cancer Network and Man to Man, a prostate cancer education and support group. The American Cancer Society is currently expanding its efforts to protect children through comprehensive school health education and similar programs designed to discourage tobacco use and promote healthy living. You can contact the American Cancer Society by phone or the internet at: 1-800-ACS-2345, 1-800-227-2345/<http://www.cancer.org/>

**The American
Lung Association**
1840 Broadway
New York, NY 10019

*The American Lung Association is a non-profit organization. For more than 90 years, the American Lung Association, with its medical section, the American Thoracic Society, has been serving the public to help fight against lung disease, including asthma, emphysema, and lung cancer. The American Lung Association's mission is to prevent lung disease and promote lung health. The American Lung Association, through the work of its many volunteers across the nation, teaches people with lung disease how to lead healthier lives. They teach children to understand and control their asthma. They fund scientists seeking better treatments and cures and work to prevent children from smoking and give help to smokers who want to quit. You can contact the American Lung Association by phone or the internet at: 1-800-586-4872/

**The National
Jewish Medical &
Research Center/
National Asthma
Center**
1400 Jackson St.
Denver, CO 80206-2761

*The National Jewish Medical and Research Center is the only non-profit medical and research center in the United States devoted entirely to respiratory, allergic and immune system diseases, including cancer, asthma, tuberculosis, emphysema, severe allergies, AIDS, and autoimmune diseases. Founded in 1899, the National Jewish Medical Research Center is dedicated to enhancing prevention, treatment and cures through research, and to developing and providing innovative clinical programs for treating patients regardless of age, religion, race or ability to pay. You can contact the National Jewish Medical & Research Center at: 1-800-222-5864/<http://www.njc.org/>
email: lungline@njre.org*

**Your Health Care
Provider**

Ask your health care provider for information on lung cancer. You may want to give a copy of CDC's draft report, "Estimation of the impact of the Former Feed Materials Production Center (FMPC) on Lung Cancer in the Surrounding Community" to your health care provider or have him/her call 770-488-7040 for a copy of the report and summary information.
